Profile Summary

Self-taught full-stack developer. I started coding in 2022 and have spent about 4 years building web and mobile apps. I built Bidii, a school management system with M-Pesa fee payments, report sheets and an offline mobile app, which is now used in a few schools in Kenya. I have also built apps for other clients. I finished my Information Technology studies at Mount Kenya University in September 2026 and I am looking for a developer role, remote or in Nairobi.

Professional Experience

Full-Stack Developer (Self-employed) – Trillionaire Designs

Nairobi, Kenya (remote) | 2022 – Present

- Built and launched Bidii, a school management system for schools in Kenya, with a Next.js web app and a React Native mobile app that works offline.
- Added M-Pesa STK Push (Safaricom Daraja) so school fees can be paid from a phone.
- Set up nightly jobs for fee balances, debtor reports and scheduled SMS and app notifications.
- Built automatic timetables, marks and report sheets, and a library app with QR code scanning.
- Built apps for other clients, including Trick World (WhatsApp activation codes, one-device login, admin panel) and Chapa Kazi, a bookkeeping app for small shops.
- Host and monitor the apps on Vercel, Supabase and Railway, using Sentry for errors and Jest and Playwright for tests.

Volunteer IT & Digital Skills Trainer – Community-Based

Nairobi | Nov 2022 – Present

- Teach community members computer basics (MS Word, Excel, email).
- Help with digital literacy awareness and troubleshooting.

Projects

Bidii School Management System – bidii-one.vercel.app

- Fees and M-Pesa payments, marks and report sheets, timetables, SMS and app notifications, library app.
- Built with Next.js, React Native (Expo), TypeScript, PostgreSQL (Supabase), Prisma and Python.

Chapa Kazi (in progress)

- Bookkeeping app for small businesses with several shops. Tracks sales, expenses and stock, accepts voice input in English and Kiswahili, and installs from the browser.

Trick World

- Client web app with sign-up, activation codes sent over WhatsApp, one-device login, a super-admin panel and offline support. Built on Supabase.

Trillionaire Designs website – trillionaire-website-one.vercel.app

Smart Dustbin – 3rd Place, National Finals

- Made for the Science & Tech Fair at Moi Girls High School. A dustbin that gives a reward after waste is disposed of, programmed in JavaScript.
- Presented it to a national audience and placed 3rd in the national finals.

Ubuntu Insurance Website

- Responsive site for an insurance startup, built with HTML and CSS.

Technical Skills

- Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS
- Web: Next.js, React, Tailwind CSS
- Mobile: React Native (Expo), SQLite, WatermelonDB
- Backend and data: PostgreSQL (Supabase), Prisma, Redis, REST APIs
- Integrations: M-Pesa Daraja, SMS, web push, Claude and Gemini APIs
- Tools: Git, GitHub, Docker, Vercel, Railway, Sentry, Jest, Playwright
- Other: Microsoft Word, Excel and PowerPoint, tech support, community training

Education

Mount Kenya University – Nairobi, Kenya

Bachelor of Science in Information Technology (September 2025 – September 2026)

Kianyaga High School – Kirinyaga, Kenya

KCSE (2024) – Grade B–

- A– in Computer Studies
- Represented the school in a national innovation competition

Emmanuel Leads Junior School – Nairobi, Kenya

KCPE (2020) – 382 marks

Certifications

- Responsive Web Design – freeCodeCamp, Nov 2022
- St. John's First Aid & Leadership Certificate – Kianyaga High School

Hobbies & Interests

- Football – played in high school, now with a local team
- Music – singing and digital music production
- Tech – trying out new frameworks and AI tools
